PROFESSIONAL SUMMARY

Software Engineer with 1.5+ years of experience building scalable, AI-powered web applications. Expert in React.js and TypeScript, with proficiency in Python (FastAPI/Django), and database management. Proven track record of integrating LLMs, designing REST APIs, and shipping secure, user-centric products end-to-end.

EXPERIENCE

- Zryth Solutions Pvt. Ltd.** *Sept 2025 - present*
Software Engineer
 - Built full-stack features for **Oswaal Books**, an AI-powered ed-tech platform generating study material (Mind Maps, Flashcards, quizzes) from academic book content, working across the React frontend and Python (FastAPI) backend.
 - Engineered a **Work Allotment system** with role-based endpoints and dashboards to assign and track content tasks, and implemented JWT authentication and Phone OTP verification for secure, passwordless login.
- Keywords Studios** *May 2025 - Aug 2025*
Research Associate Engineer
 - Trained **Amazon's Agentic AI model** by identifying workflow errors, rewriting flawed prompts, and writing Chain of Thought reasoning for human-like task execution.
 - Rubric-based assessment to score AI behavior, flag hallucinations, and enhance interpretability for RLHF pipelines.
- Nirmaan Organization** *May 2024 - Mar 2025*
Frontend Developer
 - Improved website performance, achieving a **20%** faster page loading speed by implementing code minification, image optimization, and lazy loading techniques..
 - Tested and debugged code to ensure cross-browser compatibility and resolved 15% of identified issues, improving overall website reliability.

MY PROJECTS

- * **Secure AI Vault - {Live link}** *Mar 2024 - Apr 2024*
Tools & technologies used : TypeScript, Node.js, Express, Firebase, RestAPI
 - Built a secure AI-powered vault to safely store and manage sensitive financial documents (credit/debit, Aadhaar, PAN cards), with AI-driven extraction of card details from uploaded or camera-captured.
 - Implemented Firebase Authentication, Firestore, and Storage with user-scoped access, automatic bank categorization, filtering, and quick-copy of card details (CVV excluded) for privacy.
 - Built a full-stack application utilizing a React/TypeScript UI and Node.js REST APIs, implementing skeleton screens for seamless UX and automated retry mechanisms for reliable data retrieval.
- * **Advance To Do - {Live link}** *Jan 2024 - Jan 2024*
Tools & technologies used : React, JavaScript, RESTful APIs, OAuth 2.0
 - Developed a feature-rich to-do list application, offering CRUD operations, task pinning.
 - Implemented advanced functionalities like voice-to-text input, date/time-based note retrieval, note locking, and sharing tasks via web-based APIs, search functionality, and theme customization.
 - Integrated OAuth 2.0 for secure Google and Microsoft logins and deployed the application for public access.

EDUCATION

- * **VTU University , Bengaluru** *2024*
B.E (CSE) CGPA/Percentage: 8.35

TECHNICAL SKILLS AND INTERESTS

Languages: C++, Python, JAVA, Typescript, JAVASCRIPT, SQL

Web Technologies: HTML, CSS, Reactjs, Redux, Next.js, Node.js, Express.js, Django, FastAPI, Firebase, PostgreSQL, REST API, JWT

Developer Tools: Github, VS code, Postman, Git, Docker, AWS, GCP

ACHIEVEMENTS

- * **Qualified to 2nd round of Flipkart Grid 5.0**, Solved 150+ problems on GFG, CodingNinja and HackerRank.
- * **Research Paper**, Developed multilingual fake news detection system. (Published in Journal at JETIR2405D18).
